

### IN THE SPECIFICATION

Please amend the paragraph, on page 12, lines 4-9, as follows:

Fig. 3 illustrates a perspective view of an electric meter base and an embodiment of an electric meter base bracket 120 and extension 210 [[2100]]. As described above, several dwellings have a brick facade 260. Brick facades 260 generally are thicker than the facades 145 described above. In addition, there is typically an additional space 250 between the location of the studs 140 and the meter base 110. As such, an additional embodiment includes an extension 210 to the overall system 200.
